

CERTIFICATE OF PROJECT COMPLETION

This is to certify that **Rudalph Gonsalves** along with his teammates has successfully completed the development and implementation of an innovative digital application for the Fire and Security Association of India (FSAI) Mumbai Chapter, designed to enhance the safety audit processes during the Ganesh Chaturthi festival.

The project by their team, revolutionizes how Ganesh Mandals are registered and scored. By digitalizing the entire process, the application eliminates the need for paper-based audits and significantly streamlines the evaluation of safety measures across numerous participating mandals. The application features user authentication, role-based access, geo-location tagging, and image capturing of the mandal entrances, which not only facilitates a smoother audit process but also provides critical data to Mumbai Police Department for enhanced safety and quick response capabilities.

His dedication and technical expertise were pivotal in delivering this project within the desired timeframe, surpassing our expectations in terms of functionality and user experience. The application played a crucial role during the festival, ensuring the safety and security of the events by allowing efficient and accurate assessments.

We commend Rudalph for his exceptional contribution to the FSAI and the community. This project has set a new standard in how technology can be utilized to support public safety initiatives effectively in large public cultural events.

Warm Regards,

Mr. Milind Rane,
FSAI – Mumbai Chapter President.
