PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building machine learning systems, LLM-powered applications, and agentic AI workflows. Seeking to contribute to AI Engineer role by developing and deploying production-grade AI solutions at enterprise scale through innovative use of ML, generative AI, and data-driven systems.

EDUCATION

Master of Science in Computing (Artificial Intelligence), Dublin City University. Expected 2026
Relevant Coursework: Machine Learning, Artificial Intelligence, Generative AI, Neural Language Modeling.

Bachelor of Technology in Computer Engineering, University of Mumbai 2021 - 2025
Honours Minor Degree in Data Science CGPA: 8.9
Relevant Coursework: Software Engineering, Database Systems, Cloud Computing, Data Structures & Algorithms.

SKILLS

Programming	Python, JavaScript. TypeScript, SQL
Web Technologies	React.js, Next.js, Node.js, Express.js, Flask, FastAPI, Microservices, REST APIs
AI & ML	LLMs, RAG, LangChain, Vector DBs, MCP, A2A, Prompt Engineering
Databases	MongoDB, Firebase, MySQL
Cloud & DevOps	AWS, GCP, Vercel, Git/Github, CI/CD Pipelines, Docker, Kubernetes
Testing & QA	Playwright, Automation Testing, Unit & Integration Testing, Debugging
Tools & Practices	System Design, OOP, Design Patterns, Distributed Systems, Agentic Workflows
Problem Solving	Data Structures & Algorithms (390+ LeetCode problems)

EXPERIENCE

Software Development Engineer Intern Jan 2025 - Jun 2025
Future Logic Systems Pvt. Ltd. *Mumbai, India*

- Developed a blockchain-based full-stack app using MERN, Ethereum, and IPFS and deployed on Vercel.
- Delivered an MVP in a 5-member agile team and collaborated with 2+ stakeholders for technical validation.
- Used by 5+ enterprises to authenticate 1,000+ products. Developed microservices integrated with client systems.

Automation Testing Engineer Intern Feb 2025 - May 2025
Arcon Techsolutions Pvt. Ltd. *Mumbai, India*

- Developed 150+ Playwright automation scripts for frontend, backend, API, and end-to-end testing.
- Achieved 70%+ test coverage and collaborated with QA teams to improve software reliability.
- Reduced manual testing effort by 40–50% through scalable automation and debugging practices.

Software Development Engineer Intern Feb 2024 - July 2024
VPN Digital Services Pvt. Ltd. *Mumbai, India*

- Developed a secure and scalable MERN-based full-stack web application to support cybercrime investigation.
- Deployed on AWS and contributed to CI/CD pipeline for scalable and maintainable code delivery.
- Presented the MVP to 5+ key stakeholders, collaborated within a cross-functional team of 10+ members.

Software Development Engineer Intern July 2023 - Sept 2023
Fire and Security Association of India *Mumbai, India*

- Built an app for FSAI Mumbai Chapter to enhance Ganesh Chaturthi safety audits, covering 100+ mandals.
- Digitalized registration and scoring with geo-tagging and image capture, improving efficiency by 60%.
- Implemented secure and scalable REST API using Flask, deployed on Render and contributed to CI/CD pipeline.

PROJECTS

MediSense – Enlightening Health, Empowering Lives.

[Live Demo](#) | [GitHub](#)

- Developed a Gen-AI healthcare platform using scalable backend APIs, async data pipelines, and retrieval workflows to identify cheaper medicine alternatives and securely analyze historical medical reports.
- Technologies used: MERN, RAG, Graph RAG, LLMs, LangChain, ChromaDB, Flask, TTS (ElevenLabs), Firebase, Git/Github, Vercel.
- Achievements: Won 36-hour International Hackathon, received Best Innovation Solution award from IIC-Fr. CRCE, secured pre-incubation from Mumbai University, and published in an IEEE Conference.

Coolabs– Team Collaboration & Workflow Management Platform.

[Live Demo](#) | [GitHub](#)

- Built a full-stack collaboration platform with API integrations enabling teams to manage tasks, track bugs, and coordinate development workflows through integrated project management and communication features.
- Technologies used: Next.js, TailwindCSS, Node.js, Express.js, Firebase, ContextAPI, Git/Github, Vercel.

Validium– Real-Time ML Powered Blockchain Fraud Detection.

[Live Demo](#) | [GitHub](#)

- Developed an end-to-end ML platform to detect fraudulent Ethereum transactions using real-time prediction APIs and a full-stack monitoring interface for blockchain transaction analysis.
- Technologies used: Ethereum, Etherscan API, Google BigQuery, Next.js, TailwindCSS, FastAPI, Python, Scikit learn, XGBoost, Random Forest, NumPy, Pandas, Git/GitHub, Vercel, Render.

ACHIEVEMENTS & EXTRA-CURRICULAR ACTIVITIES

- **Winner** – Smart India Hackathon 2023 (India's Largest Hackathon); Team Lead.
- **Winner** – Sunhacks 2024 (36 hour International Hackathon); Team Lead.
- **Winner** – Idea Design and Entrepreneurship Bootcamp 2024 (Organized by MoE and AICTE).
- **Judge & Mentor** – Smart India Hackathon 2025 (Fr. CRCE Internal Round) & Bit N Build Hackathon (twice).
- **Speaker** – Delivered sessions on Agentic AI (RAG, MCP, A2A) at Fr. CRCE's ISTE-approved 6-day Faculty Training Program attended by engineering faculties across India.
- **Guest Lecturer** – Delivered 5 lectures on AI (RAG), Cloud Computing (Docker, Kubernetes), and Blockchain (Hardhat) at Fr. CRCE.
- **Founder** – Received pre-incubation support from the University of Mumbai for the MediSense startup idea.
- **Best Innovation Solution Award** – From IIC-Fr. CRCE for project MediSense.

LEADERSHIP

- **Campus Lead**, AlgoZenith Campus Connection Program (2023–24); organized 3+ technical events.
- **Associate Member**, Google Developer Students Club (2022–23); conducted 5+ technical workshops and events.
